MEET MONIKA HUSÁROVÁ...

...one of the many Administrators Techstreet is proud to work with.

Monika has been working with Techstreet for four years.

"I have never seen such a library before (since my previous professional life was not so much about standards), but I liked it at first sight."

Techstreet: Why do you choose to work with Techstreet?

Monika: The whole system is easy to understand, the environment is intuitive and user-friendly, so anyone who enters the library can easily find the required document or use its features—even if the person is seeing the library for the first time. It offers many ways to organize the documents and build and customize document

Take a peek into the life of super user Monika Husárová and how she leverages Techstreet Enterprise

"The reason we work with Techstreet is their fast and professional support team."

collections. For admins (or at least for me), it's an amazing playground—a list of users with the ability to search by location, tracking the usage of documents to ensure optimal configuration of standards, and managing standards throughout the organization. I really appreciate receiving notifications of revised standards as well as a wide range of industry codes and standards from various publishers, all available under one roof. And last but not least, the reason we work with Techstreet is their fast and professional support team.

Techstreet: What's your favorite part about working with us?

Monika: There are several amazing features, but my favorite is the ability to purchase documents using a deposit account. Simple and fast. The document is available very quickly, and I can avoid all those endless business processes with invoices.

Techstreet: How important are alerts and updates to your standards management platform? Can you provide an example of how you use this information?

Monika: This feature is my second favorite in Techstreet. I'm also an administrator on our internal SharePoint regulatory news site. Alerts and updates save me a lot of time. I get a notification in my inbox, and I just add the information to a place where anyone in the company can use it. And I'm glad they really use it!!

Techstreet: What's your best #SuperUser tip for other Techstreet Enterprise users out there?

Monika: I try to use our budget wisely, so when I see that the standard is too specific to be used by many employees, I usually recommend buying a single user license instead of buying a subscription.

3 THINGS MONIKA LOOKS FOR IN A STANDARDS PROVIDER

Find out about Monika's three key things she values in a standards provider and what Techstreet brings to the table.

RANGE OF DOCUMENTS

"Techstreet offers a large collection of documents from various publishers."

PRICING

"When buying a subscription during the year, we are offered proportional pricing until the subscription renewal."

ADDED VALUE

"Users of Techstreet can find very useful additional features, such as different kinds of statistics and data."

SINGLE COPY PURCHASING

The single copy purchasing feature is an e-commerce engine built into the Techstreet Enterprise™ platform which you can turn on or off on your subscription. It enables you to purchase single copies of standards or request subscription pricing for standards not currently in your collection.

RAPIDFIRE QUESTIONS WITH MONIKA

Q: Dogs or cats?

A: A difficult question. I love both. I have a cat, but I chose the Ragdoll breed, which is known as a dog-like cat because of its nature and behavior. When Gomez is in a good mood, he retrieves toys and likes to do it.

Q: Hot coffee or iced?

A: Definitely hot.

Q: What is one place you want to travel to that you have never been?

A: I love travelling and visiting new places and one day I would like to visit Polar Park, Norway.

Q: If you could have one superpower, what would it be?

A: To make people enjoy the little things.

ALL ABOUT MONIKA

Monika has an economic background and has worked as a senior management assistant for almost 30 years.

"I need to do things effectively; I need to know (almost) everything and deliver the information quickly."

She lives in the beautiful country of Slovakia, and spends a lot of free time hiking, snowboarding, and swimming. She goes swimming twice a week in the evenings! In her free time, you can also find her at the cinema with her friends.

"Scandinavian movies are my favorites."

She likes to start her mornings off with coffee—a *must* before work. In the afternoon, she spends time with her youngest son and his school duties (if needed). Her three children are almost adults now, so when she's home alone, she spends a lot of time with her blue-eyed cat Gomez, reading a good book, or watching television.

"I love my life and I try to enjoy every moment."

MONIKA'S BEST ADVICE

We asked Monika what the best piece of advice she has ever given or received is and here's what she said:

"The Problem is not the problem. The problem is your attitude about the Problem."
